Understanding Word Ladder Puzzles

Word ladder puzzles are engaging linguistic challenges that require players to transform one word into another by changing a single letter at each step. Each intermediate word must be a valid word in the English language, which adds complexity and encourages vocabulary development. The concept was popularized by Lewis Carroll in the 19th century and has since become a staple in word games and educational exercises. Typically, word ladders start with a base word and end with a target word of the same length, prompting players to think critically about letter substitutions and word relationships.
