Understanding Active and Passive Voice

Active and passive voice are fundamental grammatical concepts that describe the relationship between the subject and the verb in a sentence. In the active voice, the subject performs the action expressed by the verb, while in the passive voice, the subject receives the action. Mastery of these concepts is crucial for grade 6 students as it improves their writing style and reading comprehension.

Definition of Active Voice

In active voice sentences, the subject is the doer of the action. These sentences are usually clearer and more direct, making them easier to understand. For example, "The teacher explains the lesson" is an active voice sentence where "the teacher" performs the action "explains."

Definition of Passive Voice

Passive voice sentences shift the focus from the subject performing the action to the subject receiving the action. For instance, "The lesson is explained by the teacher" is a passive voice sentence where "the lesson" receives the action. Passive constructions often include a form of the verb "to be" and the past participle of the main verb.
