Understanding the Object of the Preposition

The object of the preposition is a noun, pronoun, or noun phrase that follows a preposition and completes its meaning within a sentence. Prepositions are words that show relationships between other words, typically indicating direction, place, time, cause, manner, or possession. The object of the preposition is the word or group of words that the preposition introduces, creating a prepositional phrase.

For example, in the sentence "The book is on the table," the word "table" is the object of the preposition "on." Recognizing the object of the preposition is crucial for understanding sentence structure and meaning, as well as for constructing grammatically correct sentences. Object of the preposition worksheets focus on helping students identify these objects in various contexts.
