Understanding Point of View in 2nd Grade

Point of view is the perspective from which a story is told or information is presented. For 2nd graders, learning about point of view involves recognizing who is telling the story and how that influences the narrative. The three primary points of view are first person, second person, and third person, each offering a unique lens through which a story is experienced. First-person point of view uses pronouns like “I” and “we,” allowing the narrator to share personal experiences. Second-person point of view addresses the reader directly using “you.” Third-person point of view uses “he,” “she,” or “they” and provides an outside perspective on the characters and events.

Introducing these concepts early helps students develop empathy and deeper comprehension skills. Point of view worksheets 2nd grade typically include exercises that ask students to identify the narrator’s perspective and explain how it affects the story’s meaning. This foundational knowledge supports their ability to analyze texts critically and create their own written works with clear narrative voices.
