Prioritize Easier Questions

This approach prevents spending excessive time on difficult questions at the expense of easier ones. Returning to challenging questions after completing the simpler ones maximizes overall score potential.

Set Time Limits Per Question

Dividing the total available time by the number of questions provides a rough time limit per item. For example, with 12 minutes for 30 questions, approximately 24 seconds per question is ideal. Monitoring time and moving on when limits are exceeded helps maintain steady progress.

Practice Under Timed Conditions
