Overview of Working Genius Assessment

The Working Genius assessment is a productivity and teamwork tool that helps individuals discover their natural areas of work genius. Created by leadership expert Patrick Lencioni, the system identifies six types of working geniuses: Wonder, Discernment, Galvanizing, Enablement, Tenacity, and Invention. Understanding these six types enables individuals and teams to recognize their strengths and areas that may require support from others.

This assessment is widely used in corporate environments, leadership development programs, and personal career planning. By pinpointing each person's working genius, teams can optimize collaboration, assign roles more effectively, and improve overall productivity. The tool is accessible online, and its ease of use combined with insightful results has made it a popular choice for organizations aiming to enhance their workflows.
