Traditionally attributed to Hermes Trismegistus, these tablets are considered foundational documents in Hermetic philosophy. The original tablets are believed to have been written in an ancient language, possibly a form of archaic Egyptian or Greek, and their exact origins remain a subject of debate among historians and scholars.

The content of the Emerald Tablets is cryptic and metaphorical, often conveying esoteric knowledge through symbolic language. This has led to various translations and interpretations over centuries, each attempting to unravel the mysteries encoded within. The tablets' central theme revolves around the principle of "As above, so below," signifying the interconnectedness of the macrocosm and microcosm, or the universe and the individual.
